(unless superseded by a subsequent

By delegation to:

Area Management Biologist

JUSTIFICATION:

Aerial surveys conducted by ADF&G in September 2016 found a total of 57 goats (41 adults, 16 kids) on Mt. Kluchman. Based on the survey information a guideline harvest of 1-2 points (males=1 point & females= 2 points) were established for this zone of the RG013 hunt area. As of Thursday, October 6, 2016, the reported harvest is 1 female goat for a total of 2 points. Because the guideline harvest has been met and any additional harvest in this area could have long term, negative impacts to the sustainability and future harvest opportunity for this goat herd, an emergency order is being issued to close this area at 11:59 pm, on Friday October 7, 2016.
